Occupational Therapy Check Ups

IS YOUR CHILD STARTING KINDY, PRE-PRIMARY OR YEAR 1 THIS YEAR?

Would you like to know how they are progressing developmentally?
Would you like some ideas about ways to assist their skill development which underpins their success at school both academically and socially?
Our exciting new service offers parents the opportunity to have their child's development screened, through a 40min consult. This Check Up can provide peace of mind to parents who may have some worries about their child's development or progress, and is an opportunity to have these concerns discussed and the child screened in a relaxed, meaningful environment.

AGE RANGE:
Children aged 3.5 – 7 years.

WHAT IS CHECKED:
Your child's motor skills (fine and gross motor), visual perceptual, auditory skills, written or pre-writing skills, attention, sensory, behaviour and emotional skills are screened. If areas of concern are identified with speech or other medical issues, onward referral will be facilitated.

COST AND DETAILS:
An OT Check Up costs \$90 and an electronic screening report is provided to parents at the completion of this screen. If your child requires more in-depth assessment following this screen, this will be discussed with you. Should you wish to proceed with a comprehensive assessment, the cost of the screen will be deducted from the assessment fee – a fantastic bonus to families. This service is a refreshing and quick way to gain a better understanding of your child's unique profile, and to monitor progress over time.
